Our Journey

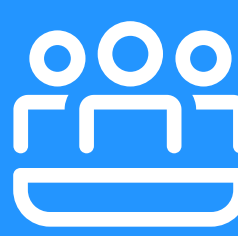

Location

Located in more than
20+ Countries

Awards

Received various
awards in the field of
protecting nature
and ecosystem

People

Work together with
local people to
protect the sea

Recycle

Recycle found
garbage into
valuable items

How its works

We teach water torah, ocean awareness, and scuba diving in Bali, and around the world. We offer programs in person or via video conferencing. We also, hands-on ocean restoration programs, such as Reverse Tashlich, beach cleanups, underwater debris removal, coral restoration, citizen science surveys, and more.

In our mission to safeguard our blue planet, the Seasave community with local residents and governments are turning the tide on ocean change,
but this is just the beginning.
